SOUND SYSTEM EDITION WEEK 2

WHY DID THIS COST SO MUCH?

The first cost was minimal - analyzing what we needed through computer modeling cost \$3500. We want professionals to upgrade us in a correct manner, not us as a congregation muddling through. There are many working parts to making our sound and projector system work, please see the bulletin board in the gym for the entire cost breakdown.

FYI- In 2010 a GMC denali crew cab pickup cost \$25,000 - Last year a 2025 GMC Denali crew cab pickup cost \$70,000

No money from the general budget is being used for this project, this is all donation based from our congregation
